Continuation of 11. does NOT place the application in condition for allowance because: Applicant argues that the rejection of claims 1-29 and 34-36 under 35 USC 103 as being unpatentable over Bakker et al. does not treat each and every limitation of the claims. Applicant's argument has been fully considered but found not to be persusive Bakker et al. teach applying a biodegradable polymer composite sheet around a tissue or bone to prevent adhesion between the tissue and bone. The biodegradable polymer can be formed from polylactides. It is the Examiners position that the limitations of independent claim 1 has been met by the teachings of Bakker et al. For the foregoing reasons, the rejections of record are maintained.
